TRIM
COIL

Trim Coil: the ideal finishing touch.

When trimming out a job, the last detail is as important as the first. NAPCO Trim Coil is an attractive, lasting way to finish any Soffit, Fascia, Siding, Window or Rainware job in your desired color.

Quality, like success, can be beautiful.

For over 40 years, NAPCO has manufactured high-quality aluminum and vinyl exterior design products. In fact, NAPCO products are subject to the toughest scrutiny: our own. We test the quality and performance of every box of NAPCO Trim Coil to assure that straight edges, length and width will remain consistent from box to box.

NAPCO Trim Coil is available in the following finishes:
Two-coat Acrylic, PVC and DuraPro™.

Last look: It's all in the details.

Discover the beautiful, protective exterior solutions in the vinyl and aluminum product collections by NAPCO. You'll find a variety of colors, finishes and styles, ideal for any home or light commercial building application.

What the Best Homes are Wearing®

Tough materials, tougher product.

Quality control engineers ensure that NAPCO Trim Coil is manufactured to the highest specifications for temper, hardness and gauge. Made with the finest-grade aluminum available, NAPCO Trim Coil is assured to be free from ripples and waves. It is tension-leveled to provide superior forming and an attractive finish.

300 colors and 3 finishes.

With over 300 colors to choose from, you'll find a variety of creative trim options to match or complement virtually any job. You'll also find three tough finishes to suit your needs. In addition to providing excellent color retention, the finishes create a protective surface that resists scrapes and scratches while repelling air pollutants, sun and water damage.

TWO-COAT ACRYLIC FINISH

- Premium two-coat acrylic smooth finish
- 50' roll; 24" coil width; .019" thickness
- Withstands chalking, fading and corrosion

PVC STRIATED FINISH

- Tough PVC coated striated finish
- 50' roll; 24" coil width; .021" thickness
- Attractive woodgrain appearance

DURAPRO FINISH

- Superior mar-resistance
- Less waste, less downtime
- Scratch, scrape and tool mark resistant
- Stain resistant
- Textured satin finish—available in white
- 50' roll; 24" coil width; .019" thickness

©DuraPro™: The ultimate protection.

Less waste, incredible mar-resistance and withstands stains like nothing else: that's the DuraPro difference. Infused with BASF PolyCeram® 580 coating*, DuraPro is mar resistant, which means less waste on the job. And, because it is scratch resistant, our DuraPro finish even makes off-site work—like garage door bends—feasible. Stains aren't a worry either: pencil marks and fingerprints wipe right off.

Easy to work with, easy on the eyes.

State-of-the-art cleaning and pretreatment processes bond coatings tightly to the metal making NAPCO Trim Coil remarkably easy to install. It cuts clean, bends sharp and lays flat, every time. When you select NAPCO Trim Coil, you can be sure of consistent quality. It handles as great as it works—and performs.

NAPCO two-coat acrylic finish

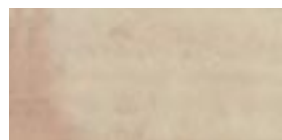

Their one-coat polyester paint

Two-coat acrylic finish gives Trim Coil by NAPCO an ultra-thick surface that resists scrapes and scratches.

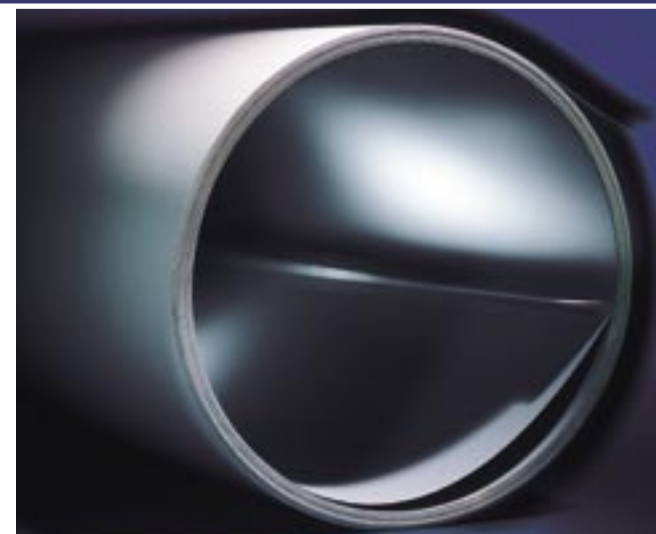

NAPCO two-coat acrylic finish

Their one-coat polyester paint

Two-coat acrylic finish has excellent color retention and ensures a consistent look for years to come.
